Agenda

01 **Project objective**

02 **Market overview**

03 **Country Analysis**

- Country and Regime Overview
- Digital, AI and SaaS Usage
- Key Competitors in the market
- ReachLaw Presence and Relationships
- Strategic Implications for ReachLaw

04 **Industry Attractiveness**

05 **Recommendations**

Project objectives

Prioritise high-value markets based on regulation, demand, and complexity

Benchmark REACHLaw vs key competitors across consulting, testing, and SaaS models

Identify growth levers combining regulatory expertise with digital and AI capabilities

This project aims to evaluate key global chemical compliance markets and define how REACHLaw can strengthen its competitive position and drive growth.

Market Overview

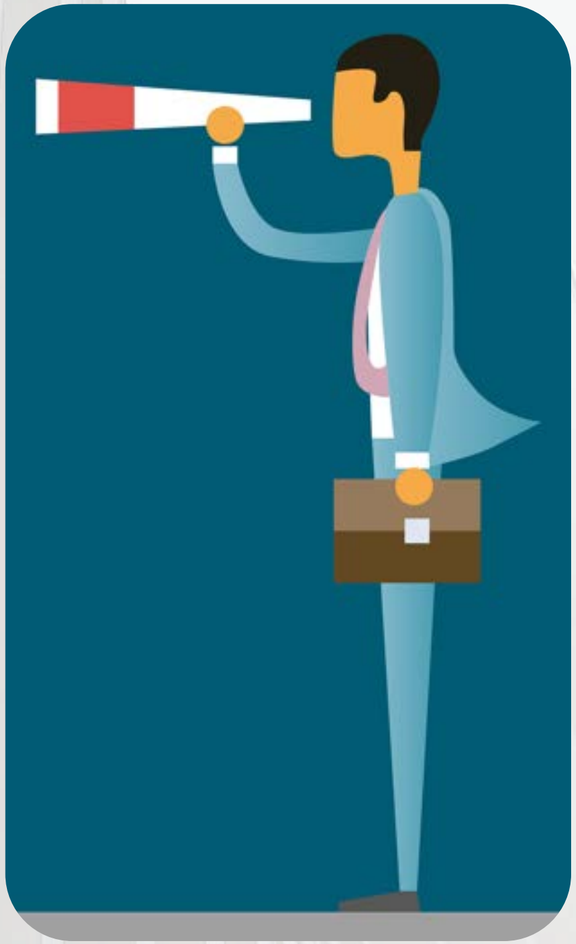

- Global chemical industry worth over $5tn annually, with expected growth to over $7.5tn by 2030
- EU is a leading market
  - €635bn turnover, 1.2mn employees in 2025
  - Sustained chemical trade surplus
- EU REACH extensive framework regulating tens of thousands of substances
  - Global adoption of similar regulations: KKDIK, UA-REACH, Brazil Law No. 15.022/2024, etc.
- Up to 10% of European chemical firms' capital expenditure on regulatory compliance alone
- Trend towards digitalisation (SaaS, automation, AI) to manage increasing regulatory complexity

GLOBAL COMPETITION

Company	Type	Revenue	Employees	Global Reach	HeadQuarters	Clients/Users	Key Scaling Model
REACHLaw	Specialist REACH consultancy	$1-$5M	11-50	60+ countries	Helsinki, Finland	1000+ clients	Partnership network + niche expertise
Enhesa	SaaS compliance platform	$200M+	200-500	33+ countries	Brussels, Belgium	5,000+ customers	Cloud SaaS - recurring subscriptions
Eurofins	Global TIC / laboratory testing group	$7.5B+	65,000+	59+ countries	Luxembourg	Thousands of clients globally	Lab network + acquisitions + specialist testing scale
SGS	Global TIC giant	$8.6B	100,000+	115 countries	Switzerland	2500 labs & business facilities	Lab network + global scale
Bureau Veritas	Global TIC	$7.5B	83,000+	140 countries	Paris, France	1,600+ offices & labs	Certification network
Intertek	TIC	$4.5B+	45,000+	100 countries	London, UK	1,000+ sites	SaaS SDS authoring + cloud delivery

FINLAND

COUNTRY AND REGIME OVERVIEW

- Advanced, export-oriented chemicals market integrated with EU supply chains
- Operates fully under EU REACH and CLP
- Helsinki hosts ECHA; Tukes enforces chemicals legislation nationally
- High compliance expectations and export dependence support demand for advisory services

Digital, AI, and SaaS usage

- Finland is digitally mature market with high enterprise AI adoption consistently-**top 3** in EU Digital Economy Index
- AI helps automate SDS extraction, regulatory monitoring, and compliance research
- SaaS platforms support REACH filings, PCN submissions, and multi-country documentation
- Digital maturity strengthens demand for scalable, tech-enabled compliance services

KEY COMPETITORS IN THIS MARKET

- EU-wide consultancies active: **SGS**, **Eurofins**, **Intertek** operating across Finland via Nordic networks
- Local Finnish/Scandinavian speacialists: **Chementors**, **DGE Finland**, and **Ecobio Oy** compete on relationships, language, and local support
- In-house regulatory teams are common in larger Finnish companies, reducing external spend on routine work
- **REACHLaw's edge** is multi-market expertise beyond EU REACH, especially for firms with supply chains into the UK, Turkey, Korea, and India

REACHLaw Presence and Relationships

- Headquartered in Helsinki, giving REACHLaw a strong home-market presence in Finland
- Proximity to ECHA supports regulatory intelligence and industry access
- Client base spans manufacturers, importers, traders, downstream users and public bodies
- Local presence is strengthened by partner relationships and wider multi-market expertise

Strategic Implications for REACHLaw

01	Position REACHLaw as the expert layer above SaaS
02	Cross-sell multi-market compliance to export-focused Finnish clients
03	Invest in digital interface
04	Own REACH 2.0 thought leadership in Nordics
05	KPI: Increase average revenue per Finnish client by 25% through multi-market service uptake within 18 months

BELGIUM

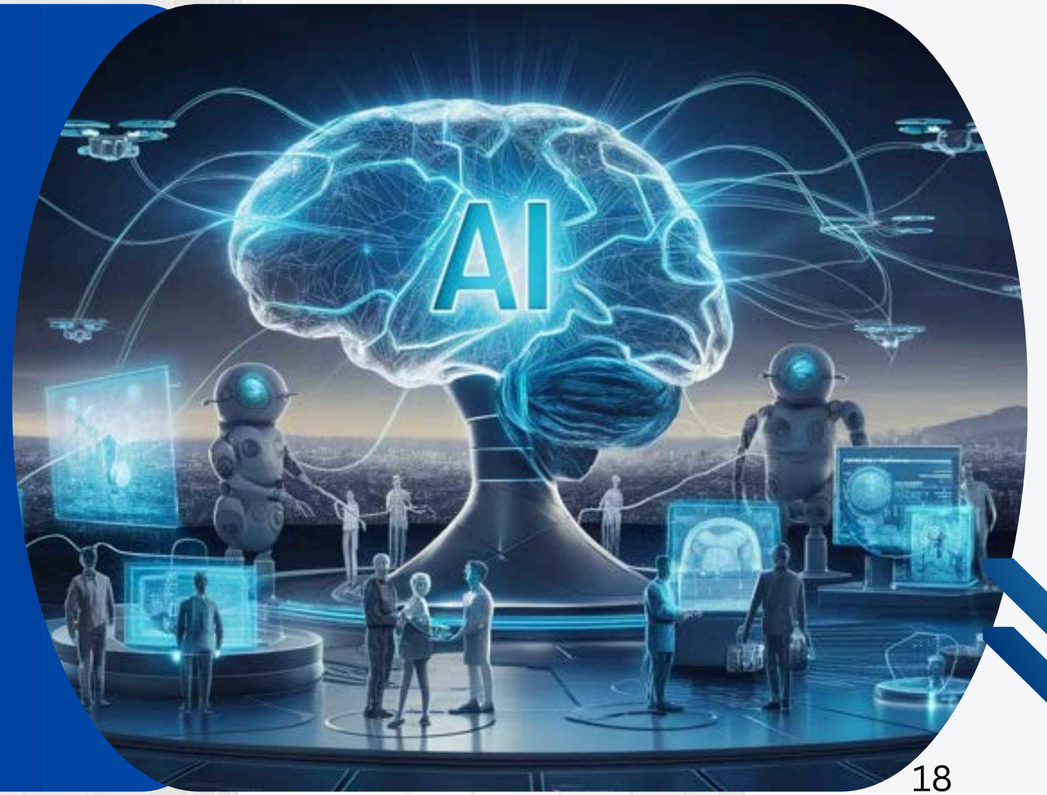

COUNTRY AND REGIME OVERVIEW

- Highly industrialised, export-oriented chemical economy
- Chemicals, plastics, pharmaceuticals ≈ 33% of total exports
- ~90% of chemical production exported → strong international focus
- Industry turnover ≈ €75bn, ~100,000 direct jobs
- Key regulations: EU REACH and CLP
- Demand driven by Antwerp chemical cluster and complex cross-border supply chains

Digital, AI, and SaaS usage

- High digital maturity compared to other markets
- Widespread use of software for REACH portfolios, SDS workflows, CLP classification
- Integration with ERP & stewardship systems
- Cloud tools automate tracking & documentation
- AI supports classification & SDS creation
- Clients expect digital + advisory hybrid services, not just manual consulting

KEY COMPETITORS IN THIS MARKET

- RedeBel Regulatory Affairs (Local)
- EU regulatory consultancies: REACH registration, authorisation, restriction, CLP work
- Enhesa: Digital compliance platform (indirect competitor to consulting services)
- ARCHE Consulting (Local)

REACHLaw Presence and Relationships

- Operates via Brussels office with strong EU regulatory access
- Core Services: dossier preparation, SDS preparation, Chemical classification and labelling
- Strong positioning due to proximity to EU policy and regulatory institutions
- Serves multinational producers, exporters, and downstream users

Strategic Implications for REACHLaw

01	Target the "human expertise gap" where SaaS can't compete
02	Build specific digital capabilities to match client expectations
03	Specific client segments to target
04	Instead of competing head-on, collaborate strategically

United Kingdom

COUNTRY AND REGIME OVERVIEW

- Chemicals & pharmaceuticals generate about £30.4bn in value added in 2023
- Chemicals were the UK's second-largest export to the US, totalling £14.2bn in 2023
- Post-Brexit dual-compliance: UK REACH + EU REACH for exporters
- UK REACH, overseen by HSE, regulates chemicals in Great Britain.
- Covers substances, mixtures, and articles across all sectors.

Digital, AI, and SaaS usage

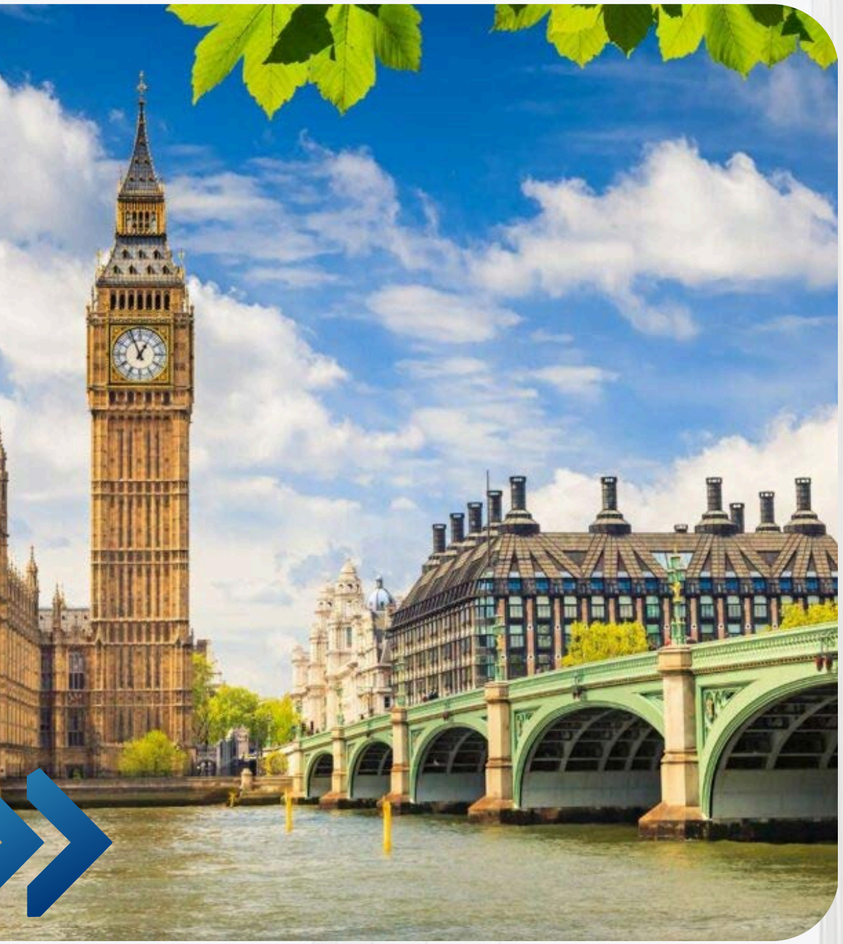

- UK firms increasingly use digital tools (inventories, SDS management, registration software)
- Penman Active Steward™: a specialised SaaS platform in this niche
- Other competitors: digital tools (portals, modelling), services-focused
- Limited AI differentiation from UK consulting rivals

KEY COMPETITORS IN THIS MARKET

- Penman Consulting: compliance consultancy with a digital platform for product stewardship and REACH data management
- Blue Frog Scientific: Science-led regulatory consultancy focused on complex REACH/ UK REACH, risk assessment, and Only Representative service
- Barkwith Group: UK/EU regulatory specialist covering REACH, CLP, SDS, biocides, fertilisers, and OR/TPR services
- ReachSupport: Small consultancy focused on REACH registrations and dossier support for SMEs

REACHLaw Presence and Relationships

REACHLaw provides UK REACH compliance services (registrations, DUINs/NRES, ATR-m guidance)

Established UK presence and strong industry relationships

Core services: dossier preparation, OR roles, product stewardship

Key advantage: Proven local delivery + global regulatory expertise across multiple jurisdictions

Strategic Implications for REACHLaw

01	Target GB importers struggling with UK REACH transitional deadlines (2029-2031) and ATR-m complexity
02	Focus on SMEs + mid-sized firms lacking internal regulatory capacity in the fragmented consultant market
03	Leverage Manchester office for policy visibility and client referrals
04	Build a client portal for deadline tracking, regulatory alerts, and document workflow management

UKRAINE

COUNTRY AND REGIME OVERVIEW

- Emerging EU-oriented chemical sector
  - EU accounted for 50% of Ukraine's trade in goods in 2024
  - Fertilisers, polymers, petrochemicals, industrial chemicals
- €5.2bn turnover in chemical industry in 2022, down from 2021
- Rapid regulatory transformation: UA-CLP (Nov 2024) and UA-REACH (Jan 2025) aligned with EU frameworks
- Mandatory registration for substances ≥1 tonne/year
- Phased compliance deadlines extended from 2026-2030 to 2027-2033

Digital, AI, and SaaS usage

- Complex, data-intensive compliance requirements
- Digital infrastructure still evolving - no fully developed submission platform
- No confirmed IUCLID adoption
- High reliance on external expertise due to regulatory uncertainty
- Strong national capability but sector-specific systems lag
- Low current maturity, high future potential for SaaS and automation

KEY COMPETITORS IN THIS MARKET

- Yordas Group: Pre-registration and full support with REACH and CLP compliance via subsidiary
- GPC Regulatory: AR services and full registration management
- REACH24H: AR and registration services, REACH compliance analysis

REACHLaw Presence and Relationships

- Established Kyiv office
- Full UA-REACH and UA-CLP services
- Strong positioning as bridge between EU and Ukrainian regulation
- Engagement with regulatory developments, authorities, and industry updates
- Integrated into global network enabling multi-market compliance support

Strategic Implications for REACHLaw

01	Focus on pre-registration and early registration client
02	Bundle EU-REACH and UA-REACH services
03	Differentiate through regulatory expertise and advisory strength
04	Build early advantage in compliance infrastructure
05	Monetise multi-year phased compliance cycles

Turkey

COUNTRY AND REGIME OVERVIEW

- Emerging industrial economy, strategically positioned between Europe and Asia
- Basic chemical manufacturing= €11.7bn in 2026, which indicates a large industrial base.
- Chemicals ≈ $30.8bn exports, 13.6% of total exports, second-largest exporting sector → targeting $35B in 2025 with 230+ destination countries
- 61.4% of chemical exports come from IKMIB member companies

Digital, AI, and SaaS usage

- Complex KKDIK/SEA requirements drive demand for automation
- Turkish competitors use SDS authorising software for labelling & dossier preparation
- Online portals handle KKS registrations and compliance workflows
- ERP-style tracking manages substance volumes and supply chains
- Use of Tool-assisted consulting—Limited adoption of advanced SaaS/AI platforms

KEY COMPETITORS IN THIS MARKET

- Lisam Systems Turkey - Istanbul-based
- TURKREACH (Doruksistem) - Istanbul-based, one-stop KKDIK consultancy
- B-Lands Consulting: specialist regulatory consultancy for REACH-type legislation including KKDIK and CLP equivalents

REACHLaw Presence and Relationships

- Istanbul office providing KKDIK + SEA compliance since 2011
- Offers Only Representative services (critical for foreign exporters)
- Positioned to serve IKMIB member companies (61.4% market share)
- Potential clients include: Export-focused chemical manufacturers, importers and multinational chemical firms

Strategic Implications for REACHLaw

01 Local Presence Advantage Istanbul office since 2011 beats foreign competitors entering late

02 İKMİB Market Control
Target their 61.4% export dominance (773 members) before competitors partner

03 Export Growth Capture
Follow $30.8B→$35B trajectory - cosmetics ($2.1B) and plastics ($9.4B) leads

SOUTH KOREA

COUNTRY AND REGIME OVERVIEW

- South Korea is one of the top 5 global chemical producers
- Highly industrialised, export-driven chemical economy
- Chemicals ≈ $62.9bn exports in 2025
- Industry supports semiconductors, batteries, electronics and automotive sectors
- Key regulations: K-REACH and K-BPR (registration, evaluation, biocides)
- Market is cyclical (e.g. 2025 petrochemical losses), but long-term growth driven by EVs and advanced materials

Digital, AI, and SaaS usage

- K-REACH and K-BPR create complex data, testing, and registration requirements, increasing demand for digital compliance tools
- Firms use dossier generation software and SDS automation tools for registration and labelling
- Government systems (e.g. K-REACH IT platforms) manage submissions and compliance workflows
- ERP-style systems track chemical volumes, imports, and supply chains

KEY COMPETITORS IN THIS MARKET

- SGS / Intertek / UL Solutions: global testing + compliance
- KTR / CIRS Group: strong local presence, K-REACH expertise
- REACH24H Korea: digital-led compliance + international reach
- Knoell Korea / Acta Group / EcoMundo: specialist regulatory consultancies
- Competition split between local experts, global firms, and digital/SaaS providers

REACHLaw Presence and Relationships

- Operates in South Korea through local partnerships and regional regulatory expertise
- Core services: K-REACH registration, SDS preparation, classification and labelling
- Strong positioning supporting international firms entering the Korean market
- Serves manufacturers, importers, and exporters needing multi-market compliance

Strategic Implications for REACHLaw

01 Target ~1,000+ substances due for K-REACH registration by 2030, focusing on mid-sized importers

02 Build multi-year compliance contracts aligned with 2027/2030 deadlines (recurring revenue model)

03 Partner with local players (e.g. KTR/CIRS-type firms) to access domestic client networks

04 Develop digital tools to support high-volume data, SDS, and dossier workflows

INDIA

COUNTRY AND REGIME OVERVIEW

- **$220 billion** chemicals industry, **7–9% CAGR**, targeting **$1 trillion** by 2040
- 4,500+ manufacturers - pharma, agrochemicals, specialty chemicals, cosmetics
- New CMSR regulation (India's REACH) finalising 2026–27 ; 10,000+ substances in scope
- Compliance services market: **$1.54B → $2.34B** by 2029
- Each manufacturer already managing 635+ annual regulatory obligations

Digital, AI, and SaaS usage

- Large MNCs and multinationals already using digital compliance tools widely
- MSME sector (majority of manufacturers) still largely manual - huge opportunity
- Growing awareness of AI-assisted SDS authoring, substance tracking, regulatory alerts
- Digital compliance tools adoption accelerating ahead of CMSR implementation

KEY COMPETITORS IN THIS MARKET

- GPC (Global Product Compliance) - main international rival, limited India depth
- Local firms: Continuum India, Absolute Veritas have domestic rules expertise, but limited EU REACH depth
- BIS Labs do government testing only, no advisory capability
- Opportunity: No dominant EU-specialist consultancy established in India yet

REACHLaw Presence and Relationships

- Established India presence with offices in New Delhi and Mumbai
- Long-standing advisory work for Indian exporters on EU REACH and related regimes
- Recommended by Chemexcil and active in ORO/EU stakeholder networks
- Already known and trusted on both the Indian industry and EU regulator sides, making CMSR entry hard for fast followers to copy

Strategic Implications for REACHLaw

01	Phase 1: Sell EU REACH advisory to Indian exporters now.
02	Phase 2: Launch CMSR readiness services
03	Use REACHLaw’s EU REACH expertise as the differentiator
04	Support with local partnership + thought leadership.
05	Jan 2026 India-EU FTA eliminates duties on 97.5% of Indian chemical exports, set to double chemical shipments to EU by 2032-perfect timing for REACHLaw's Phase 1 EU REACH advisory

BRAZIL

COUNTRY AND REGIME OVERVIEW

- Brazil is the largest chemical market in Latin America by consumption
- High import dependence - China ~22% (largest) + US ~16%
- GHS (ABNT NBR 14725:2023) — mandatory since 2025 (SDS, classification, labelling)
- Brazil is moving toward a REACH-like system (Law No. 15,022/2024)
- Introduces a national chemical inventory, substance registration, and risk assessment requirements

Digital, AI, and SaaS usage

- Increasing regulatory complexity → demand for digital compliance tools
- Use of SaaS platforms for dossier management & SDS automation
- Emerging AI for classification and data processing
- Integration with SAP ERP-type systems for supply chain tracking
- Government digital systems developing but less centralised

KEY COMPETITORS IN THIS MARKET

- SGS / Intertek: global testing, certification, and regulatory compliance services
- REACH24H: international chemical regulatory consultancy with strong digital tools
- GreenWorld Consultoria: local consultancy focused on environmental and chemical compliance in Brazil
- Intertox: specialised chemical safety, toxicology, and regulatory compliance consultancy

Strategic Implications for REACHLaw

01	Brazil is a high-priority entry market: chemicals imports hit $72.4bn in 2025 with record $56.8bn trade deficit
02	Target importers and foreign manufacturers first: Brazil REACH requires registration for substances ≥1 tonne/year
03	Lead with GHS/SDS work: updated GHS mandatory 4 July 2025 for SDS/labels.
04	Enter via local partnerships + long-term advisory: framework still forming, needs recurring support.

Industry Attractiveness

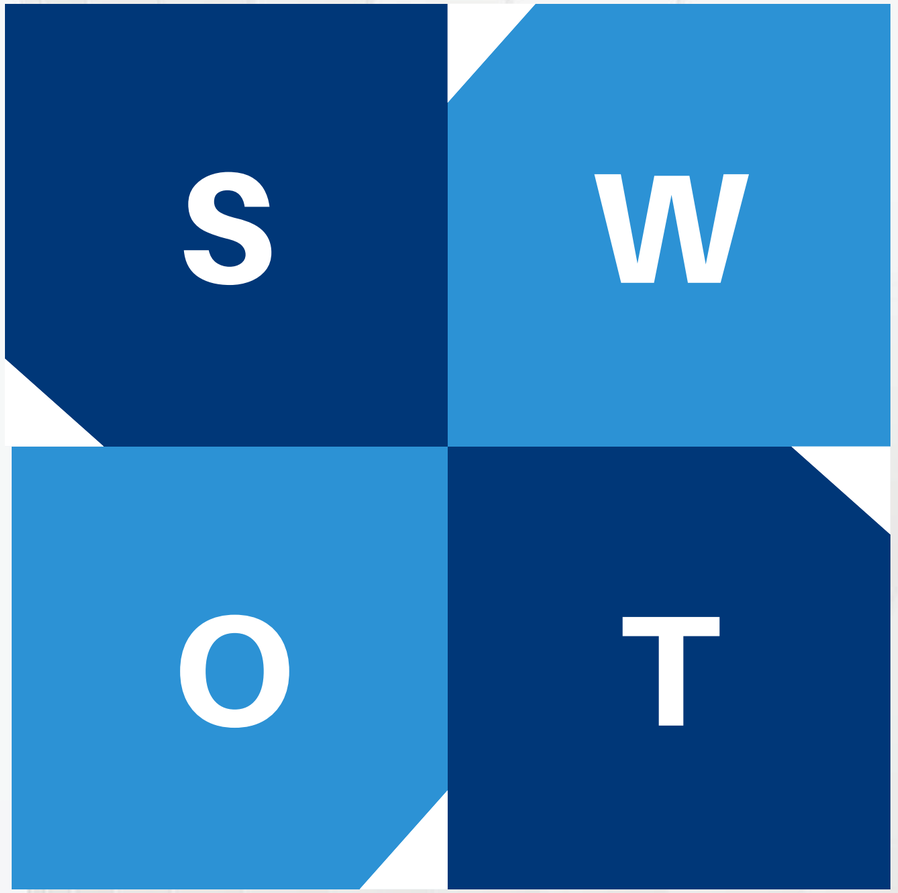

Country	Rivalry	New Entrants	Buyer Power	Supplier Power	Substitutes	Attractiveness
Belgium	High	Low	High	Low–Med	Medium	Low
United Kingdom	High	Low	High	Low–Med	Medium	Low
South Korea	High	Low–Med	Medium	Low	Low–Med	Medium
Turkey	Medium	Medium	Medium	Low–Med	Low–Med	Medium–High
India	Low–Med	Medium	Medium	Medium	Low–Med	High
Ukraine	Low	Medium	Medium	Low	Low	High
Brazil	Medium	Medium	Medium	Medium	Low–Med	Medium–High

REACHLAW

Apex Global Consulting

STRENGTHS

- Strong expertise in REACH & regulatory compliance
- Presence in key hubs (Brussels, Istanbul)
- Ability to handle multi-country compliance
- Established relationships with exporters & multinationals

WEAKNESSES

- Limited proprietary SaaS / digital platform
- Smaller scale vs global players like SGS and Intertek
- Dependence on consulting-heavy model
- Potential resource constraints in scaling globally

OPPORTUNITIES

- Growth in emerging markets like India and Turkey
- Increasing regulatory complexity (REACH, KKDIK equivalents)
- Rising demand for digital compliance tools / SaaS
- Export growth in chemical sectors

THREATS

- High competition in mature markets like Belgium and United Kingdom
- Digital competitors (e.g. Enhesa)
- Price pressure from large clients
- Political / economic risk (e.g. Ukraine)

Market Prioritisation & Entry Strategy

HIGH PRIORITY

India – HIGH PRIORITY
- Lower competition
- Increasing regulatory complexity
- Strategy: Early market entry + build long-term client base

Turkey – STRATEGIC PRIORITY
- Strong export growth
- Existing presence advantage
- KKDIK compliance demand
- Strategy: Strengthen local partnerships + scale client acquisition

Ukraine – STRATEGIC PRIORITY
- Structurally attractive
- Strategy: Build long-term partnerships and establish digital tools

S. Korea - STRATEGIC PRIORITY
- Large, export-driven chemical market
- K-REACH deadlines → recurring demand
- Digitally advanced compliance environment
- Strategy: Local partnerships + scale digital solutions

Brazil – SELECTIVE EXPANSION
- Moderate competition
- Growing regulatory needs
- Strategy: Target high-value clients (multinationals/exporters)

Market Prioritisation & Entry Strategy

LOWER PRIORITY

Belgium / United Kingdom

- Highly saturated
- Intense competition
- Strategy: Focus on niche, complex regulatory services

Finland

- Already well established
- Strategy: Maintain current presence, increase digitalisation

Recommendations

FINLAND

- Position REACHLaw as a high-value advisory partner alongside platforms like Enhesa
- Deliver a hybrid model (SaaS + expert advisory) for complex regulatory work
- Focus on deep expertise (authorisations, dossiers, authority engagement)
- Cross-sell multi-market compliance services to Finnish clients with global supply chains

INDIA

- Adopt a two-phase market strategy:
- Phase 1: Target Indian exporters needing EU REACH support
- Phase 2: Lead CMSR advisory upon regulation finalisation
- Position REACHLaw as the EU REACH expert translating into CMSR
- Capture first-mover advantage before competitors scale

Recommendations

BELGIUM

- Position Brussels as a EU regulatory intelligence hub
- Launch “REACH 2.0 readiness” advisory services
- Combine digital dashboards with expert advisory
- Compete with Enhesa by focusing on high-complexity regulatory work

TURKEY

- Launch a dedicated KKDIK service line immediately
- Target EU-based exporters already using REACHLaw services
- Position offering as “same expertise, new market”
- Build local capability (Turkish-language support + regulatory liaison)

Recommendations

SOUTH KOREA

- Target foreign manufacturers entering Korea (EU/US clients)
- Position as the only advisor bridging EU REACH + K-REACH
- Focus on high-growth sectors (semiconductors, batteries, cosmetics)
- Develop a lightweight digital client portal for compliance tracking

BRAZIL

- Move quickly to establish first-mover advantage in REACH-style advisory
- Launch Only Representative (OR) services via a local partner
- Target existing EU clients with Brazilian exposure
- Position as the first EU-specialist entrant in the market

Recommendations

UNITED KINGDOM

- Own the EU + UK dual compliance niche as a differentiated offering
- Target mid-sized UK firms and international importers
- Position services as premium, cross-border advisory (not commodity)
- Leverage complexity post-Brexit as a competitive advantage

UKRAINE

- Enter early via a low-cost partnership strategy
- Build relationships with local industry bodies and associations
- Position as the EU–Ukraine compliance bridge advisor
- Maintain a monitoring and insight-led market presence

RECOMMENDATION: STRATEGIC PATH FORWARD FOR REACHLAW

Expand in High-Growth Markets

- Focus expansion on India, Turkey, and Brazil
- Capture first-mover advantage in emerging REACH-style regulatory markets
- Target export-driven clients needing multi-jurisdiction compliance

Defend & Differentiate in Mature Markets

- Focus on high-value, complex advisory in Belgium and United Kingdom
- Leverage policy proximity and regulatory expertise
- REACHLaw has a big advantage in sustainability

RECOMMENDATION: STRATEGIC PATH FORWARD FOR REACHLAW

Build a Hybrid Digital Model

- Combine consulting with digital tools and platforms
- Compete with players like Enhesa
- Strengthen long-term client retention

Maximise Existing Client Value

- Cross-sell multi-market compliance services
- Target global clients with complex supply chains
- Increase revenue per client
